Product Features

It's nice to know that you use breast milk to feed your babies, breast milk containing several antibodies; babies can obtain immunogenic molecules from breast milk. So the breast milk is the best choice for the growth time of babies. Some times you can not find a suitable time to feed your babies, our breast pumps are the ideal appliances.

The design of the mini electric breast pump is suitable for Moms who are inconvenient to feed their babies directly; this unit adopts four suction mouth dispersion device, let the suction distributed uniformly around the nipple. It can alleviate pain; meanwhile avoid the nipple collapses, makes Moms more beautiful and healthier.
